**Resolved Question**[Show me another »](#)**Why do people waste money on useless research?**

Ok, I know sometimes the things people research that make no sense to me are actually useful... but why do people waste millions or even billions of dollars on reseach projects that are pointless?

ok, like an artical I just read on yahoo it said scientist spent 650 million dollars to make a list of all the fish in the ocean... 650 MILLION dollars people. That could have been used to help with cancer or feed homeless people. How the heck does it take 650 million dollars to make a list of fish???

[http://news.yahoo.com/s/ap/20101004/ap\\_o...](http://news.yahoo.com/s/ap/20101004/ap_o...)

There are other examples, but this one is the lastest I could find... what the heck people?

\$123 billion

## Talk to Me About my Research

Imagine an application that researchers could use to record short videos of themselves speaking about their research and generate a web page with those videos on it.

Dr. Eynstine made a website so that more people could find out about his research, but he is disappointed that hardly anyone seems to look at his site.

Dr. Eynstine decides to try out a new application he heard about. He records a few short videos of himself answering questions about his research.

The application automatically creates a new website to present the videos.

Dr. Eynstine shares the link to his new site. People seem to really like the videos and he is happy that so many people are learning about his research.

### Intro

Hi! I'm Anuj! I'm Abhinav! And I'm Julia. We're Students at Carnegie Mellon University. We're working on something called FromTheLab. It will let researchers publish their research quickly, easily, and effectively.

### Problem

↙ from the outside

The problem is that most research, ~~(much of it funded by taxpayer dollars)~~ seems to only produce research papers.

Not that some people don't read research journals. And

Even though we research
